

Starlight Support™ by Moonlight Slumber

Simply the best crib mattress available

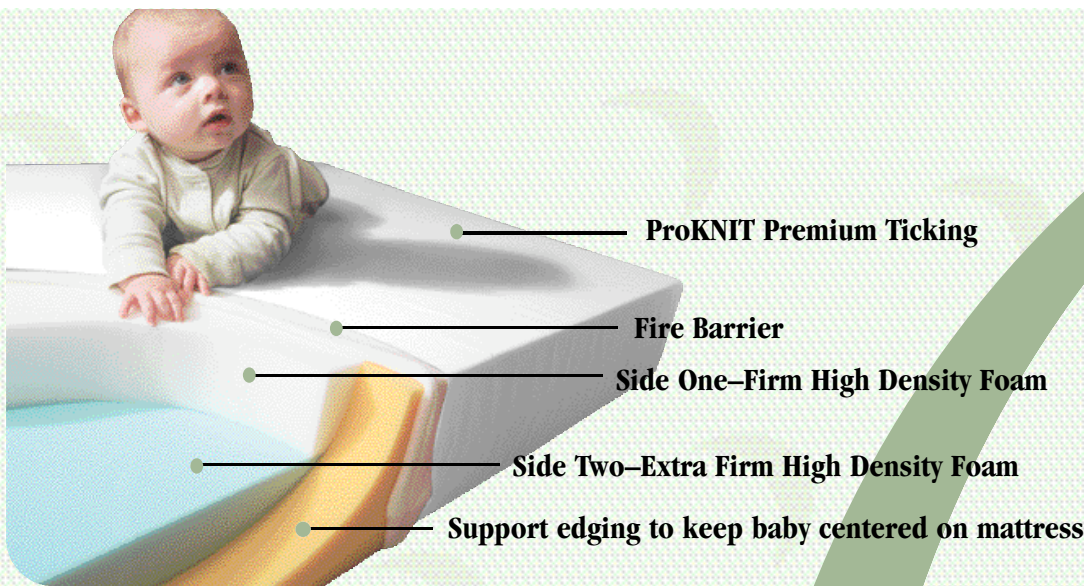

Safe, healthy, comfortable and elegant,
you can't buy a better product, period.

SAFE. Industry and Federal standards for crib mattresses are surprisingly lax. However, the safety of little dreamers everywhere is the primary goal of Moonlight Slumber™. That is why our mattresses exceed all current and planned safety standards. Each Starlight Support™ mattress crib and cradle, comes standard with a fire resistant barrier—exceeding the Federal Flammability Standard of FR, fire retardant. What this means is unparalleled safety and peace of mind for the most discerning parents.

HEALTHY. Developed from a line of proven health care mattresses used in hospitals and nurseries nationwide, Starlight Support™ mattresses offer unique health features.

- *Antimicrobial.* Each Starlight Support mattress is antimicrobial—treated inside and out to safely and effectively prevent bacteria growth for the lifetime of your mattress.
- *Welded seams.* Instead of sewing mattress covers to the support material as is the industry standard, Starlight Support seams are welded, with no needle holes in the mattress cover to invite dust mites or bacteria to flourish.
- *No taped edges.* The decorative tape, or roll, that is standard of typical mattress seams actually prevents fluid run-off by absorbing excess body fluids. The damp cording then becomes host to bacteria. Starlight Support's welded seams eliminate the need for taped edges and, therefore, eliminate the unintended parasitic guests.

- *Premium ticking.* Standard vinyl mattress covers leave much to be desired. They don't breathe, they are noisy, they chip as they age, and they are unattractive. By contrast, Starlight Support ticking is made of premium, woven ProKNIT. ProKNIT is impenetrable by dust mites, allergens, and fluid. It is flame retardant, antimicrobial and stain resistant. What's more, it offers a smooth, suede-like texture—a standard of quality you have to feel to believe.

COMFORTABLE. Starlight Support™ mattresses are available with high-density foam or innerspring support in standard or custom sizes. Either option offers two levels of comfort. One side offers a firmer surface for newborns, while the other is slightly softer to help older babies sleep more comfortably—more peacefully—through the night. Both are engineered within SIDS reduction guidelines, designed with pressure-reduction techniques that come from years of experience in hospitals and health-care facilities.

ELEGANT. From the first look, you'll know that Starlight Support™ mattresses are different. The simple shape, clean lines and lush ticking stands apart from all other mattresses. The smooth surface and deep padding pulls sheets taut and makes a crisp, beautiful bed. When a Starlight Support mattress is used, all your bedding takes on a more elegant appearance.

UNPARALLELED QUALITY. UNPARALLELED SAFETY.

Starlight Support mattresses are simply the best mattresses available for discerning parents and their little dreamers.
